

Symbiosis in Context - Connecting Insights across Systems and Scales

Monday, 7 October 2024

Evolutionary context (13:10 - 14:00)

| time | [id] title | presenter |
|-------|---|----------------|
| 13:10 | [10] Evolutionary genomics of microbial pathogens | KEY, Felix M. |
| 13:40 | [4] Evolution of metabolic complementarity in algal-bacterial symbioses | DITTAMI, Simon |

Evolutionary context (15:30 - 17:30)

| time | [id] title | presenter |
|-------|---|-----------------|
| 16:00 | [6] Coevolutionary dynamics of the ancient symbiosis between the mouthless flatworm <i>Paracatenula</i> and the chemosynthetic bacteria <i>Ca. Riegeria</i> . | DUARTE, Igor |
| 16:15 | [7] Evolutionary long-term relationship of <i>Spiroplasma</i> in neotropical <i>Drosophila</i> | KOIVISTO, Elina |
| 16:30 | [5] Identification of a nine-gene effector cluster in <i>Sporisorium reilianum</i> , with an important role in host-adaption | SCHIRAWSKI, Jan |
| 16:45 | [13] Diversity, functionality, and evolutionary history of bacterial symbionts in false click beetles | WIERZ, Jürgen |
| 17:00 | [68] Meet the speakers | |
